Environmental Policy Statement

Plating Technology, Inc. is committed to conducting its operations in a manner that protects the environment, safeguards employee and community health, complies with applicable environmental regulations, and supports the long-term success of our customers and our business.

Environmental stewardship is an integral part of our operational discipline and quality system. Responsible environmental management supports consistent production, regulatory confidence, and customer trust.

Plating Technology is committed to the following principles:

Regulatory Compliance
Comply with all applicable federal, state, and local environmental laws and regulations related to wastewater discharge, waste management, chemical handling, spill prevention, and environmental reporting.

Pollution Prevention & Resource Conservation
Prevent pollution at the source by minimizing waste, rework, and scrap, and by conserving water, energy, and materials where technically and economically feasible.

Wastewater & Waste Management
Operate and maintain wastewater treatment and waste handling systems to ensure consistent compliance, protect municipal infrastructure and the environment, and properly manage all waste streams.

Employee Training & Accountability
Train employees on environmental responsibilities applicable to their job functions and hold individuals accountable for following established environmental procedures.

Emergency Preparedness & Incident Response
Maintain procedures to prevent and respond to environmental incidents, ensure timely reporting when required, and implement corrective actions to prevent recurrence.

Customer & Stakeholder Responsibility
Provide accurate environmental information when requested, support customer audits and sustainability initiatives, and communicate openly regarding environmental or regulatory constraints.

Continuous Improvement
Regularly review environmental performance and pursue practical improvements that strengthen environmental control, operational reliability, and customer confidence.

We are fully committed to this Environmental Policy and will provide the resources necessary to maintain compliance and drive continual improvement.

Matt Raskin – President & CEO
